MANAGING ENTERPRISE COMPLEXITY

MANAGING ENTERPRISE COMPLEXITY

Today's business world is shifting rapidly. Decisions have to be made faster than ever, and under increasing pressure. To survive – and thrive – your company must be able to transform its business model and continuously adapt to fast-changing markets.

But that's not all. Successful companies are the ones that can make the right choices to govern their operations in a sustainable way. They have the tools to strike the right balance between capacity for innovation, cost optimization, and risk management.

At MEGA, we feel that the key to successfully managing enterprise complexity is having an interactive view of your entire business. That gives you the visibility and information you need to make informed decisions, navigate change, and ensure that your strategies are properly understood and executed.

For more than 20 years, we have been helping corporations and governments optimize and transform their operations, making sure they are continuously aligned with their organizations' business strategies and objectives.

To help customers sustainably improve business performance, we have developed a unique set of enterprise governance software and consulting services that can boost operational effectiveness and efficiency, and help them optimize, transform and govern their operating models.

MEGA International
CEO and Founder

YOUR CHALLENGES, OUR SOLUTIONS

CORPORATE GOVERNANCE

We help the management of large companies deploy and implement an effective corporate governance framework and policy. Our integrated governance, risk, and compliance (GRC) approach will break down the silos in your organization and instill GRC best practices using a realistic, accurate view of your organization. Our solutions can streamline data collection and information exchange, allowing for rapid, company-wide decision making and implementation. That means you get a more efficient, less costly corporate governance system.

- Manage the impact of regulations and policies on your operations
- Assess the business risks of non-compliance
- Implement preventive and corrective actions to mitigate risk exposure
- Ensure regulatory and policy compliance through internal controls

IT STRATEGY DELIVERY

We help CIOs and IT leaders efficiently optimize their IT assets – applications, data, and IT infrastructure – and business dependencies. That will let you safely assess the potential impact of new projects, rationalize your IT system, and make your entire information system more agile.

- Leverage the full impact of your information system and component IT assets
- Understand dependencies and assess the potential impact of change
- Align your IT assets with business priorities
- Rationalize your IT capabilities and technology

BUSINESS STRATEGY EXECUTION

We help CxOs design and execute an impactful business strategy. With our solutions, you will be able to guide implementation by setting specific business objectives, outlining transformation programs, and carrying out improvement projects.

Our experts will help you understand the effects of change on your operating model. We will work with you to evaluate different implementation scenarios and manage the transformation to your target operating model.

- Design and manage a robust strategic planning process
- Align strategic intent, organizational objectives, and KPIs
- Monitor strategy execution through programs

DIGITAL TRANSFORMATION

We help CIOs implement digital transformation programs by giving them a single view of their business. Our scenario-based software works like a dynamic GPS, helping you navigate through a changing landscape. You will be able to make better, faster decisions throughout the transformation process while taking risk into account and ensuring corporate governance.

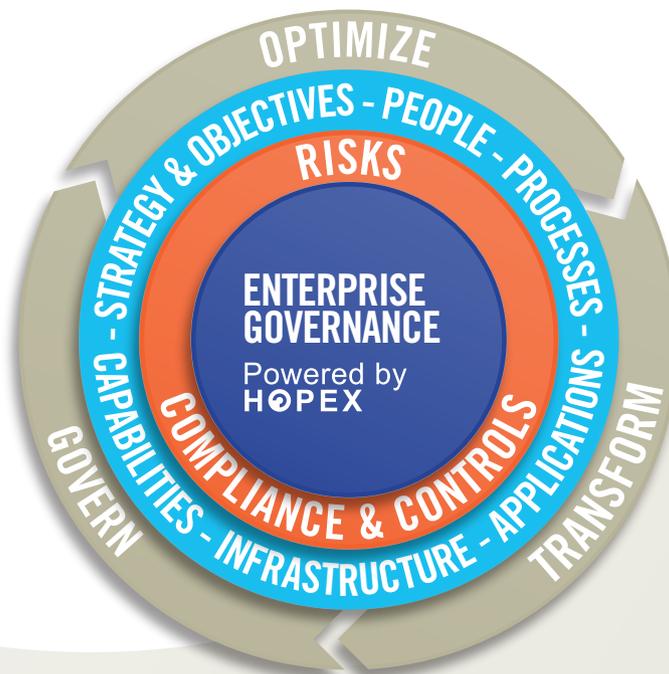

- Assess scenarios for a “digitally-modified business”
- Identify the business lines and IT capabilities that will be affected by the transformation
- Analyze the impact on your existing organization and business model
- Plan the transformation steps and the development or adaptation of capabilities

MEGA SOLUTION FOR ENTERPRISE GOVERNANCE

IMPROVE THE QUALITY AND SPEED OF STRATEGY EXECUTION

We offer a comprehensive lineup of enterprise governance software that gives you an interactive view of all your business components. Our suite is powered by HOPEX, our signature platform, which brings together industry-leading practices in enterprise architecture and governance, risk, and compliance (GRC) into a single system. With MEGA, you get the visibility and tools you need to navigate change and improve decision making – with a sharp focus on your business needs.

Our fully-integrated solutions will help you better exploit synergies and pool efforts among your departments. It will give employees a clear, common vision of all key elements of your organization, and make sure that everyone is working towards the same goals and supporting your organization's strategy.

HOPEX fuels our integrated suite of enterprise governance solutions, giving you:

- A collaborative, web-based working environment
- A single shared enterprise repository for the entire organization
- Access to the repository according to different user profiles
- Structured guidance at every step of your project

We will help you boost your success rate for:

- Delivering desired business outcomes
- Improving the customer experience
- Bridging strategy to execution

Unlike legacy applications, our scenario-based solutions acts as a GPS to navigate change and enable improved decision making – while supporting corporate governance and mitigating business risk.

MEGA CONSULTING AND PROFESSIONAL SERVICES

PROFESSIONAL EXPERTISE

Our services include: software implementation and integration; the setup of a MEGA services center; functional support for software administration; and knowledge transfer to your project teams.

CONSULTING

We boast over 20 years' experience in operational governance. Our consultants bring together a unique skill set spanning enterprise architecture, application portfolio management, and governance, risk, and compliance. We help you achieve operational excellence and carry out successful organizational transformation programs to control costs, manage risk, and boost innovation.

KNOWLEDGE TRANSFER

Transferring our skills and knowledge is one of the key contributions our consultants will make to your organization. We will work with you to develop sustainable methods for your business that you can apply for the long term. Our consultants will give your staff the tools they need to maintain and further develop the required capabilities.

TRAINING

So you can get the most out of your enterprise governance project, we offer training on our software, approach, and methodology. The training was developed by MEGA University and is given by experienced MEGA consultants. You will learn everything you need to know about deploying our powerful software for maximum effectiveness. The training is designed not only to transfer knowledge, but also to encourage discussion among participants about prior experience and new ideas.

MEGA's 130+ consultants are by your side every step of the way

- ...→ Targeted support for your EA, APM, and GRC projects
- ...→ Active in professional organizations and international working groups
- ...→ Extensive knowledge in business processes, information systems, and methodologies
